Owens Commercial™ Grip Strut Steps. These Commercial Grip Strut Steps for heavy use are manufactured from commercial grade grip strut aluminum and are powder coated to prevent rust and corrosion. End caps are welded on both ends to add strength and give it a nice finished look. The end caps are also great for vehicles with large fender flares or other obstructions in the wheel wells. The grip strut design on these aluminum steps provides an aggressive sure-foot area for secure stepping all year round. These steps feature easy-to-install body mount brackets for most applications. All applications have been tested to withstand up to 600 lbs and perform day after day on the job.
